## RECEIVER HITCH

### KIA Sportage / Hyundai Tucson

### 2005 & Up

#### INSTALLATION INSTRUCTIONS

1. **Check** all parts. **Read and understand** instructions completely before beginning installation. Clean the under side of the frame. Clean out the weld nuts in the frame.

#### Parts List:

- 1) Hitch
- 6) 10mm - 1.25 x 40mm Hex Bolts
- 6)  $\frac{3}{8}$ " HD Flatwasher
- 6) 10mm Lockwashers

2. **Remove** the exhaust hangers and lower the exhaust to ease installation.

3. **Remove** the tow hook, four bolts on the passenger side. Remove the rear most bolt behind the tow hook. Return tow hook and bolts to vehicle owner.

4. **On the driver side**, remove the two rear most bolts. There is a third weld nut on the driver side, you will be using it to install the hitch.

5. **Clean** the frame before installing the hitch. Make sure the 10mm - 1.25 bolts will screw into all six weld nuts. If a bolt won't screw in easily, you will need to clean the weld nut of debris. The best way to do this is to use a 10mm - 1.25 tap. With a small amount of lube, run the tap through the weld nut. The bolt should screw in easily.
6. **Lift** the hitch into position and secure with six 10mm - 1.25 hex bolts, 10mm lockwashers and 3/8" HD flatwashers.

7. **Snug** all bolts.
8. **Torque** all the 10mm - 1.25 bolts to 37 ft/lbs. Use a torque wrench.
9. **Reinstall** the exhaust hangers you removed.
